

Square arrangement

Take four sets of four picture cards (or Ace, Jack, Queen and King cards from a pack of cards).

Arrange the cards into a 4 x 4 arrangement, so that every row, column and diagonal contains one of each card (or Ace, Jack, Queen, King of each suit heart, spade, diamond and club).

Square arrangement

solution

Solution:

It's harder than it looks,
especially when making sure
that the diagonals work too!

J	A	K	Q
K	Q	J	A
Q	K	A	J
A	J	Q	K
