

## Factor dice game

A game for two or more players.

You will need...

- three 1 → 6 spot dice
- a pencil and paper to record your score

Players take turns to roll all three dice.

Once the dice have been rolled, the three numbers are added together.

The player then writes down all the factors of their dice total.

Once all the factors have been found, they are added together. The sum of all the factors becomes the players score for that round.

The winner is the first player to reach a score of 100.
