## You will need

13 counters or coins.

Odds and evens

Draw a big board like this.
Put counters on the board.
You can put only one in each space.
Place all 13 counters.
There must be an **odd** number in each row and column and in each of the two diagonals.
When you have done it, draw the counters on the board.
Bring your drawing to school.

Solution: Odds and evens

For example,

Extension
Place 10 counters.
Get an **even** number of them in each row and column and the two main diagonals.

Other solutions are possible.
