

You will need

someone to work with,

some pieces of dry pasta

and a mug.

Play pasta!

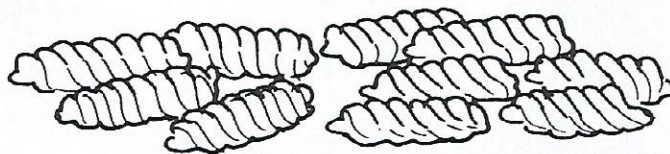

Fill the mug with pieces of dry pasta.

Ask as many people as you can to guess how many pasta pieces there are in the mug. People can have more than one guess.

Write all the guesses.

When you have written several guesses, tip out the pieces of pasta and count them.

Arrange them in piles of 10 to make the counting easier.

Write down the exact number.

Whose guess was closest?

Bring all the guesses to school.
