

You will need

someone to work with,  and some coins (1p, 2p, 5p, 10p, several of each).

# Coin challenge

Put a handful of coins on the table.

Take 2 coins without the other person seeing.

Tell them how much you have, e.g. if you took a 10p and a 1p you say, "I have 11 pence."

Your partner has to guess which 2 coins you have. If they are right first time, they choose a coin to keep.

Now they take 2 coins and tell you how much they have.

You have to say which coins they have.

Play this several times.

Now draw round some pairs of coins and write the amounts beside them.

me

you

10p
