

Handy mathematics

Remembering which months of the year have 30 or 31 days.

Look at the backs of your hands so that you can see the knuckles.

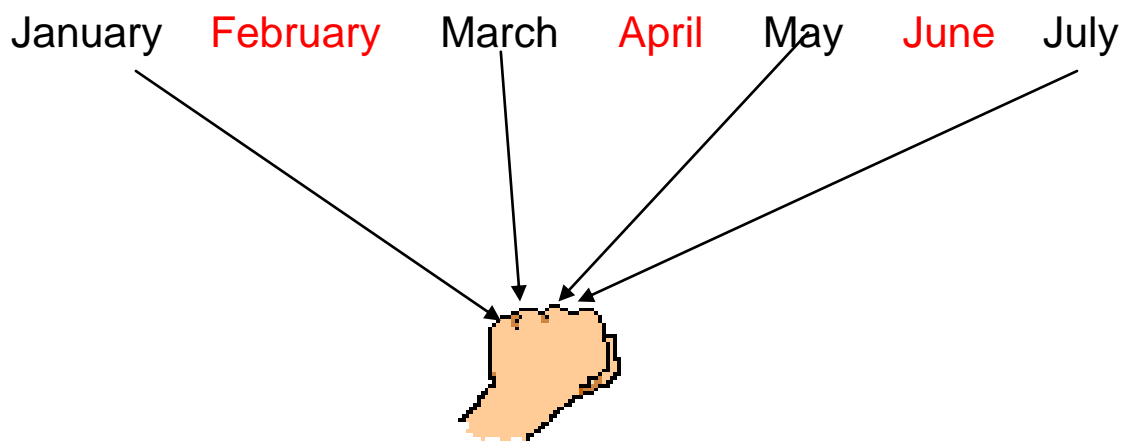

Working from the left to the right.

Where there is a knuckle the month has 31 days, the dip between the knuckles with the exception of February have 30 days.

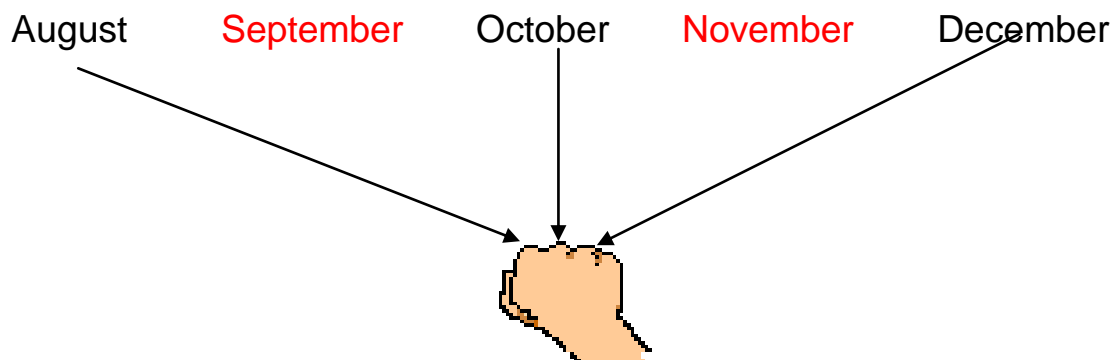

Key

Knuckle months – all have 31 days. —————→

Dip months (except February) all have 30 days. (red text)

Repeat with the right hand as follows.

Do not count the last dip and knuckle.
